On motion of Mr. J. SPEED SMITH the House resolved into committee of the Whale on the consideration of the said bill - Mr. ALEXANDER in the Chair.

Upon the Clerk's report of the bill, Mr. Speaker UNDER WOOD addressed the Chair in explanation and support of the provisions of the

amendment or substitute. Mr. COX. If the slaves of the wife may not be subject to execution for the husband's debts, there would be made a difference in this respect between slave property and real estate: for her real estate might be so appropriated during their joint lives .-

He objects to that provision in the bill. Mr. Speaker UNDER WOOD. The bills makes a change in respect to the liabilities of the lands of the wife; and provides also that the real estate of l

husband during their joint lives: and after the death of the wife, the bill gives the husband a life estate in the slaves, as he has now a life estate in the lands.

Mr. COX. There was still an invidious principle in the bill. There was a protection proposed for the estate of the rich wife, while the property of the wife of the poor was left without protection from the merciless creditor.

Mr. L. COMBS. The object was to save something when there was something to be saved.

Mr. J. S. SMITH. He recollected that but the other day the gentleman from Fleming was opposed to the bill proposing a protection to poor householders. Mr. S. was sorry to see that gentleman opposing the protection of both the rich and the poor.

Mr. COX maintained his consistency. In apposing the proposition of the gentleman from Madison, that certain property should not be executed with-out the consent of the wife in writing, &c., and in and prevent the sale of a certain portion without the wife's consent, there was a manifest consistency.

Mr. DALLAM belonged to that much abused and proscribed class of men, the lawyers, (though they that if it became a law, it must needs be a very fruitful source of litigation. The honorable Speak er had told us that the question about necessaries for household support was easily determined and understood: but Mr. D. affirmed that there was not a more vexed question in law practice. The difficulty did not consist in the principle, but in its application. What might well be considered as necessary in one family might be truly regarded as a superfluity in another family: and for the numerons difficulties arising under the application of this principle of excepting necessaries, he said, let the records of the courts answer. Amend the bill by striking out the 18th section, (which authorizes the Governor to subscribe one hundred thousand dollars) and insert in lieu thereof the following:

"That the counties bordering upon Licking river, by their County Courts, a majority of the Justices of said county concurring, be, and there are hereby, authorized to subscribe for stock in said Company to any amount not exceeding ten thousand dollars each, the sum subscribed to be raised by an ad valorem levy to be made upon the assessor's list in said county, by the County Courts thereof; the sums subscribed to be payable in three equal annual inopposing the proposition to divide the family estate stalments: Provided, however, that before the County Courts, or either of them, shall be authorized to subscribe for the stuck, or make the levy aforesaid, the said Court, or Courts, shall direct a poll to be opened at the annual election, at the various places sometimes called him doctor here.) Mr. FINNELL proceeded then to address the committee to the end of the thirty minutes-which, in continuation, will be reported for this paper.

Mr. ALEXANDER proposed to amend the amendment by adding a provision, that the said Company shall re-imburse the State to the full amount of the present value of the public works towards the improvement of said river-said value to be ascertained. &c.

Mr. COX was opposed to the amendment, but desired to hear the views of the gentleman offering it. Mr. ALEXANDER then briefly submitted the reasons for his amendment-affirming that his object was not to encumber the bill, but only to pro-

teet the interests of the State. Mr. COX made a brief response. He could assert the proposition, he said, and maintain it before a Court of Equity, that the Licking region was now justly entitled to an appropriation of \$100,000 from the treasury of the Commonwealth. But he would forbear, as the friends of this improvement had now declined calling on the State for a single dollar. It wife, without children, the survivor shall inherit to was their purpose simply to improve the navigation of that stream with their own funds-it was their wish to open a channel for the produce and resources of that valley to pass into market at Cincinnati and elsewhere, by investing their own eapital for the purpose, and for this privilege they were willing to forego forever the setting up of any claim upon the justice of the State for the completion of the begun inprovements on that river. Mr. Speaker UNDERWOOD favored the proposi tion in general terms, but insisted upon the amendment above recited, with reference to the 15th section of the bill.

There is no virtue in servitude. The cause of a great portion of the vice that has existed in the world is the degradation of woman, and servile dependence upon the caprice of man. The lowness of their wages, and their total inability to procure a subsistence of themselves, drive them o seek the aid and protection of man; and, if disappointment ensues, or want and destitution be their lot, they are then at the very mercy of the nerciless. Their very virtues often become vices, od sink them deeper in misery and disgrace. Their emlerness of soul, their sympathizing affection, heir warmth of love, and dependent condition, are out the strings which man, the tyrant, plays upon, to accomplish their infamy and his own ruin. Give them equal protection of the law, throw over them he mantle of charity, raise them from that state of utire dependence, and secure to them, at least, their wn property. Let them be elevated in the scale of being by substantial power and influence, not by base flattery and empty praise, which are only intended to deceive. They will then feel that they are of ome consequence, that they have rights which are secured by law. They will then realize that they have been treated with proper respect, and admitted o rank and importance, and will be under greater obligations to support a character, and maintain the dignity of human nature. Let the tendency of legislation be to equality, and we shall gradually see a better state of society and morals. And the time vill soon come, when we shall not see poor, depenent, destitute woman driven to artifice and to sinster and indirect means to obtain that power and influence which are, her right, and which the law would directly give. Then will kind offices and oothing cares flow from choice-from the natural impulse of sympathizing souls, and not from the necessity of their condition. Then, indeed, will hey "divide our sorrows and double our joys."

Civilization has progressed in the word just in proportion as woman has been elevated in society. and made the equal of man. There was a time when woman was supposed to have no soul, and even the Scriptures were invoked to prove the abit is not said that God breathed into her the breath of life and she became a living soul, therefore she has no soul, but is a mere excresence or appendage of man. They were next allowed to have souls but were considered as slaves, made specially for the use of man, having no rights of themselves, and were bought and sold as merchamlize. This is now he case in many parts of the world. Christian naions have advanced at least one step farther, and discarded the idea of woman's slavery, and do not nelude them aming articles of trade. Yet still nany seem to consider them as property, and claim them as their right. Would you believe it, that in this enlightened age, in this christian land, a man, who has held the highest judicial office in the State. and is honored among the first in the legal profesion, a man of spoiless integrity and honor, should assert the principle, that a man has as much right in his wife as to his horse? Recently, before the committee on Religion, in this Hall, that principle was gravely asserted. I recoiled at the idea of properly in woman-sinking her to the level of brutes, instead of raising her to the rank of man, while, at naw, and even here, we still retain a reinnant of the customs and prejudices of the darker ages. And

Are they not a safe depository-much safer than ourselvesmore true to their trusts, less apt to waste, less apt to wander in devious paths? Is there danger in trusting them? Perchance they may be widows. Are we not willing to provide for them some small pittance, to aid them in procuring a subsistence during the loneliness of a dreary life!

And what is it we propose to give them? Do we rob any one for their sakes? Do we injustice to Do we encroach upon the rights of any! No, We do but give them their own-nay, but a small part of their own. Shall they not be secured n the enjoyment of their own? Does not woman relinquish her name, and very legal existence, and all power of acting and contracting! does she not devote her body and her whole life to her husband, with all her rights, credits, moneys, and effects? And can he meanly desire more-can he desire to strip her of every vestige of her former identity, and take away all merit from her actions!

If it is any part of our duty to protect the weak and helpless, let us rally to the aid of woman in some substantial form. Let us secure them in some small degree against the casualties of life, and the cold-hearted selfishness of a selfish world. Let us furnish the shield of the law, and remove vexaion and want, so that they can direct their thoughts undisturbed to the best means of preparing their children—our children—for tuture nsefulness, while the evulerance of a mother's love is poured out in that channel in which God and nature designed it should flow.
